**Brief Explanation:**

In accordance with Education Code 60119, each school district's governing board must hold a public hearing no later than the eighth week of the school year to determine, through a resolution, whether each pupil in the district has sufficient textbooks or instructional materials, or both, in the following subjects: mathematics, science, history/social science, and English language arts. The governing board must also determine whether each student enrolled in a foreign language or health course has been provided sufficient textbooks or instructional materials. According to Williams Legislation, sufficient textbooks or instructional materials means that each pupil, including English learners, must have a district-adopted textbook or instructional materials, or both, to use in class and to take home. Access to two sets of instructional materials is not required.

Williams Legislation also requires science classrooms to have basic science laboratory equipment available for students in science laboratory courses offered in Grades 9 to 12. A *Williams Science Laboratory Equipment Worksheet* has been developed to help schools determine if there is sufficient science lab equipment. Schools are to complete a worksheet for each science lab course and room where it is taught.

To ensure your school is sufficient and meets the requirements of the law, including basic science laboratory equipment, it is necessary for you to complete the attached 2021-22 Principal Verification Statement - Instructional Materials Sufficiency – Gr. 9-12 and Uniform Complaint Procedure Posting (Att. B) by September 10, 2021 and email a signed copy to the Instructional Materials Office Administrative Aide Roxana Garcia, [rgarcia4@sandi.net](mailto:rgarcia4@sandi.net). *Note: Schools subject to a Williams team audit by the San Diego County Office of Education are not required to participate in this process. Compliance will be determined by the Williams team visit.*
