San Diego Unified School District

Policy Manual

I. Introduction

It is the mission of San Diego Unified School District that all San Diego students will graduate with the skills, motivation, curiosity and resilience to succeed in their choice of college and career in order to lead and participate in the society of tomorrow. In order to achieve this mission, the Board of Education establishes policies, procedures and regulations.

Administrative Procedures and Regulations provide more specific details that put policy into practice; they may tell how, by whom, where, and when things are to be done. Administrative procedures and regulations may set forth specific requirements and details that implement and enforce policies. The Board of Education has delegated to the superintendent administrative responsibility for the development, maintenance, and dissemination of district procedures and regulations. All administrative procedures and regulations are available on the district's web site at https://www.sandiegounified.org/about/policies_procedures. Circulars providing step-by-step instructions and assigning specific responsibility are issued as needed and are available at https://www.sandiegounified.org/a-to-z_index/bulletins_and_circulars.

Policies are principles adopted by the Board of Education to chart a course of action; the board specifically is charged with this responsibility. District policy statements are presented in Section II of this document, followed by an index to these policy statements. The policy manual is available on the district's web site at https://www.sandiegounified.org/about/policies_procedures.

The Board of Education is responsible and accountable for effectively governing the school system. The primary means by which the board exercises its power and fulfills its responsibility is through the policies it establishes. These policies are necessary for effective school governance and management and are interrelated. The policies of the school district set the foundation and basic commitments of the San Diego Unified School District, its view of people, goals, and philosophy.

Policies made by the board serve to:

- Establish direction, a “guide to action.”
- State a purpose or goal.
- Communicate what the board desires to achieve and why.
- Provide a rationale and framework for specific requirements.

- Establish basic controls and assign authority or general responsibility. The development of policy is a dynamic process, responsive to changing problems, issues, and needs. Thus, new policies are developed and previous policies reviewed and revised as necessary.

This document is a supplemental reference to district policies. All inquiries should be directed to the Board of Education Office, San Diego Unified School District, 4100 Normal Street, Room 2231, San Diego, CA 92103-2682 or to (619) 725-5550.

II. Policy Statements

The operation of the school system requires the Board of Education to establish policies for sound, effective, and efficient educational and business practices. The board of the San Diego Unified School District has established policies that are contained in this Policy Manual and are organized according to categories in the classification system of the National School Boards Association. There are 11 categories or sections; a short description of each follows. *Note: The San Diego Unified School District is converting to the California School Boards Association (CSBA) format and numbering. Revisions to this 2021 Policy Manual include notations of policies that have been converted and adopted by the Board of Education.*

A. School District (p. 4)

The policies in this section provide the setting and context for all other policies. School district policies are the structure and foundation of public education and of the district. They are the principles that underlie the operation of the district schools.

B. Board of Education (p. 9)

This section defines the bylaws of the board—its organization, practices, procedures, and ground rules for conducting meetings. Guidelines for some of the board’s closest relationships are given—relationships with the superintendent, attorney, advisory committees, consultants, and the media. Policies on the policymaking process are also set forth in this section.

C. General School Administration (p. 16)

Policies on the management of the district and its schools are delineated in this section. The district’s administrative structure, line/staff relationships and policy implementation are topics included in this section.

D. Fiscal Management (p. 21)

E. Facilities (p. 24)

These policy statements concern planning, construction and naming of new facilities. Related activities such as disposition, lease, sale and/or alternative utilizations are included.

F. Instruction (p. 30)

The policies in this category pertain to the instructional program: goals, basic programs, special programs, activities programs, instructional arrangements and resources, curriculum development, guidance, academic achievement, and testing. The policies in this section, more than any other, will reflect the school system's and school board's mission.

G. Support Services (p. 48)

Noninstructional services and programs are covered by policies in this section. They include security and safety program, buildings, grounds and equipment management, material resources, transportation and food services, and communication/information systems.

H. Students (p. 54)

These policies pertain to students: admissions and attendance, rights and responsibilities, conduct and discipline, student safety and welfare, and other student matters.

I. Personnel (p. 64)

The school board's personnel policies are contained in this section for all classifications of staff. Issues addressed include work schedules/assignments, ethics, evaluation, health and welfare, grievance procedures, leaves and absences, and termination/retirement.

SCHOOL DISTRICT

Philosophy

- A-4000 The Board of Education supports the philosophy that education, in addition to providing academic skills and knowledge, should help students to value themselves and others, to realize the development of their talents and aspirations, and to become contributing members of society. The board is committed to the following beliefs:
- a. All children will learn and show academic gains every year of instruction.
 - b. All children can benefit from a quality, integrated experience.
 - c. The amount of instructional time spent by students on their studies can make a difference in achievement.
 - d. School experiences and education do make a difference in the future lives of children.
 - e. A high level of instructional quality can be maintained even in an environment of decreasing resources.
 - f. Students learn at different rates and in different ways. Dropout prevention practices and other differential provisions should ensure opportunity for completion of educational programs.
 - g. Closing the achievement gap is a priority.

(Approved 3-88. Revised 5-11-93, 7-05-2005. Related Procedures 4000, 4050, 4097, 4105, 4106, 4110, 4230, 4720, 4755, 4760, 4766.)

- A-4500 The Board of Education believes that children and staff of all races and ethnicities benefit socially, politically, and economically from integration programs. The district's integration programs promote positive race/human relations, solicit the exchange of ideas, and respect diversity of opinion and culture. All students have the right to a quality education that ensures excellence in academic achievement and full participation in the democratic process. Quality in education demands equity in outcome where race, ethnicity, and gender are not distinguishing variables of student success.

The board believes we have an obligation to treat all children in an equitable manner (just, impartial, and fair). In order to ensure equity for all students the board has adopted the following goals for integration:

- a. Improve student achievement and ensure equitable outcomes among students of all racial and ethnic groups.

SCHOOL DISTRICT

- b. Integrate students to reflect the racial/ethnic balance of the district's student population.
- c. Provide equitable access to education programs and services for all students.
- d. Demonstrate positive race/human relations among students and staff of all racial and ethnic groups.

The board further believes that it is the responsibility of all district employees to actively support, promote, and demonstrate commitment to integration and ensure the accomplishment of district and site integration goals.

(Approved 1-26-93. Related Procedures 4105, 4106, 4107, 4235, 4236, 4262, 4310, 4311, 4312, 4585, 4587, 5411, 6020, 6135.)

- A-4510 The Board of Education believes that leadership in integration begins with the Board of Education and includes certificated and classified staff, site administrators, and central office administrators. Integration leaders actively participate in integration programs and concentrate their efforts and resources on reaching the four goals for integration.

(Approved 5-11-93. Related Procedures 0620, 4105, 4106, 4262, 4310, 4311, 4312, 5411, 6135.)

- A-4520 The Board of Education believes that policy-, decision-, and recommendation-making committees must reflect the diversity of the student population.

(Approved 5-11-93. Related Procedures 1100, 1320, 3105, 3110, 3300, 4230, 4505, 4605, 4815, 6215, 6400, 7226, 7610, 9055, 9060, 9062, 9066.)

- A-4600 The Board of Education believes that full integration of a school is achieved when all students have equal status; receive the same high level of instruction; feel trusted, valued, and supported; and student representation in the decision-making bodies reflects the ethnic diversity of the school.

(Approved 5-11-93. Related Procedures 4000, 4050, 4097, 4105, 4106, 4107, 4110, 4230, 4235, 4236, 4262, 4310, 4311, 4312, 4353, 4585, 4587, 5411, 6020, 6135.)

- A-4650 The Board of Education believes that racial isolation, occurring in communities that are either predominantly White or non-White (African American, Alaskan/Indian, Asian, Filipino, Hispanic, Indochinese, Pacific Islander), leads to the development of racial stereotypes, promotes inequitable practices, and is detrimental to the goals of the district. Racial isolation is harmful to students of every color.

A-5000 It is the mission of San Diego Unified School District that all San Diego students will graduate with the skills, motivation, curiosity and resilience to succeed in their choice of college and/or career in order to be productive, responsible citizens and to lead and participate in the society of tomorrow. The Board of Education accepts the premise that the primary and basic purpose of the public school is to provide an effective educational program for students. Construction

Note: E-4000 has been replaced by Board Policy (BP) 7150, Site Selection and Development.

- E–4100 It is the policy of the Board of Education to encourage a balance between initial construction costs of new facilities and long-term energy costs while maintaining thermal comfort in the classroom conducive to a quality learning environment. To support the district’s continued goal to reduce overall utility consumption, maintain thermal comfort, and comply with the California Energy Commission regulation for all new schools (Title 24, Part 2, Section 53, of the State Building Code), the Board of Education establishes the following policy:

FACILITIES

- a. All new schools will be built based on the following:
 - (1) **Base Temperature.** The effective temperature maximum is established at 78°F as the basis for determining whether a classroom is selected to get passive thermal mitigation measures and/or air-conditioning when future funding allows. Since it is not feasible to be within this temperature all of the time, a maximum deviation of up to 10 percent of the amount of time the students are in the classroom during the summer hours is established (i.e., if students spend 200 hours in the classroom during the summer, the temperature could exceed the 78°F effective temperature by up to 20 hours).
 - (2) **New Spaces and Schools.** Schools in Climate Zones 2 and 3 shall include air-conditioning. In Climate Zone 1, all new spaces and schools will have cost effective passive measures installed and be engineered so that they can be retrofitted for air-conditioning at a future date if they will not meet the above-recommended standard.
- b. Exceptions will be made for specified areas requiring air-conditioned space—performing arts, auditoriums, and TV studios at new secondary schools—and on a case-by-case basis for other spaces and/or other kinds of facilities to address air quality and/or noise pollution.
- c. Where appropriate, other public agencies that may contribute to the need for air-conditioning to mitigate reduced air quality and/or noise pollution will be contacted to assist in the costs associated with providing an air-conditioning system.
- d. Planning for new construction, adding permanent or relocatable facilities, or modifying existing facilities will include consideration of the building’s energy efficiency, as delineated in Title 24, Part 2, Section 53, of the State Building Code, for natural, mechanical ventilation or air conditioning as determined during the planning process.

F-1010 The policy of the Board of Education is to support school restructuring as a process to achieve a fundamental change in school organization and construction that will prepare all students for the future. The purposes of school restructuring are to improve the quality of instruction and student achievement. School restructuring will require greater site autonomy and control over budgets, shared decision-making among staff members, parents and students, and appropriate accountability standards for student outcomes.

(Approved 11-88.)

F-1025 It is the policy of the Board of Education that the primary purpose of integration programs is to eliminate the achievement gap among major racial/ethnic groups and to improve student achievement while promoting greater harmony among students of different racial/ethnic groups in integrated settings. Integration programs provide complementary enrichment and support to the district's basic instructional program and are based on sound principles of teaching and learning. Curriculum, instruction, and assessment are interrelated components of this integrated system.

Service Learning

F-2400 The Board of Education desires that all students develop a strong sense of personal and social responsibility. Development of this virtue can occur by infusing service learning instructional formats as an integral component of curriculum. Research shows that infusion of these integrated teaching strategies have improved critical thinking, communication, and planning skills while enhancing the targeted curricular framework. The district desires that service learning methodology be linked and coordinated with instructional programs. The PARC model, which emphasizes Preparation, Action, Reflection, and Celebration, is supported by the district.

The district recognizes that service learning can help students develop skills, career awareness, and self-esteem. Service experiences can also motivate students by allowing them to apply their skills and knowledge to local needs and problems and showing them that they can make a contribution to their community by being part of the solution.

The district supports the integration of service learning activities with the curriculum to enhance the relevance of instruction and to meet standards in all subject areas. These activities will provide exhibits that can be used as portfolio entries and the basis for the senior exhibitions. Staffs are encouraged to collaborate with local public and nonprofit agencies in order to develop service learning activities that meet educational objectives and also support current community efforts to meet health, environmental, or public safety needs.
