

Email letter to Emerson-Bandini families, February 10, 2017

*Hello Emerson-Bandini families, as many of you already know, there was some concern about the quality of water at the Emerson campus the last few weeks. We contacted the San Diego Unified's Safety Office immediately of a possible odor in the water at Emerson campus, the department acted quickly by sending drinking water samples out for analysis and providing bottled water to all students and staff at the school, as well as to the onsite charter school's students and staff. The results of the water analysis came back showing non-detectable levels for bacteria. Yet, due to the complexity of this type of test, and erring on the side of caution, the district reached out to the County Department of Environmental Health to ask for a review of the water test. Until that input is received from the county and the all-clear is provided, the district's Physical Plant Operations will continue to provide bottled drinking water. As always, our priority is for the safety of our students and staff.*
