Nationally renowned industry partners work one-on-one with students both in the classroom as well as in clinical settings, allowing students to apply skills learned inside the classroom to real-world situations.

Each year, Academy students work to develop and execute a community health fair. Held on the Clairemont campus, students inform fellow students, staff and community members about the prevention of global health issues such as heart disease, diabetes, infectious diseases, as well as the importance of eating healthy and maintaining an active lifestyle.
