SPECIAL COMMUNITY INFLUENZA VACCINE

- INACTIVE INFLUENZA VACCINE FOR DEERS ELIGIBLE PEDIATRIC PATIENTS (FOUR YEARS - 17 YEARS – PRIORITY – IF EVENT ACTIVITIES PERMIT DEERS ELIGIBLE PARENTS/CAREGIVERS MAY ALSO BE OFFERED INFLUENZA VACCINE).
- PARENTS/CAREGIVERS SHOULD ALLOW TIME TO PARK AND BRING THE CURRENT IMMUNIZATION RECORDS FOR THE VISIT.
- CHILDREN 6 MONTHS TO 8 YEARS OF AGE RECEIVING THEIR FIRST INFLUENZA VACCINE, WHO HAVE NOT PREVIOUSLY RECEIVED A TOTAL OF TWO OR MORE DOSES IN THEIR LIVES, OR WHOSE INFLUENZA VACCINATION HISTORY IS UNKNOWN WILL NEED TWO DOSES THIS SEASON FOUR WEEKS APART. THE VACCINATOR CAN CONFIRM IF YOUR CHILD NEEDS A SECOND DOSE AND SCHEDULE THE NEXT VISIT AS AN APPOINTMENT DURING THE POST VACCINATION WAITING PERIOD.
- NMCS D EVENT STAFF RESERVE THE RIGHT TO DEFER PATIENTS BACK TO THE PRIMARY PCM IF PRECAUTIONS OR CONTRAINDICATIONS RAISE CONCERNS FOR PATIENT SAFETY OR NEED FOR TEMPORARY DEFERRAL FROM VACCINATION.
- SHOULD I VACCINATE IF RECENTLY EXPOSED TO COVID-19?. CDC RECOMMENDS THAT ROUTINE VACCINATION SHOULD BE DEFERRED FOR PERSONS WITH SUSPECTED OR CONFIRMED COVID-19, REGARDLESS OF SYMPTOMS, UNTIL CRITERIA HAVE BEEN MET FOR THEM TO DISCONTINUE ISOLATION. THE REASON FOR THIS EXCEPTION IS THAT VACCINATION VISITS FOR THESE INDIVIDUALS SHOULD BE POSTPONED TO AVOID EXPOSING HEALTHCARE PERSONNEL AND OTHER PATIENTS TO THE VIRUS THAT CAUSES COVID-19.
