Standley will begin preparations in our parking lots on December 13th for the installation of solar panels. This is a vital upgrade to our school, but it will come with some inconvenience. Parking lots will be closed off to all, including staff, until the work is completed prior to the summer break. This means parking along Governor and Radcliffe will be limited for drop off and pick up as more cars park along those streets. The white curb is for drop-off and pick-up only so please refrain from waiting in that area to allow for a smoother traffic flow. School police are aware of the changes and will be supporting the neighborhood. While parking lots are closed, we will maintain the driveway through campus for school buses, emergency vehicles, and district delivery only. Please, do not drive through campus between the hours of 7:30 a.m. to 3:30 p.m. We have notified students of the parking lot closures as this may also change their route to school if they normally enter from the stairs of Standley Park. Thank you for your patience and support as we work through these first stages of improvements to our campus.
