School counselors are professional advocates for schools, who are expected to develop comprehensive programs that improve student learning, to devote 80% of their time to direct student services (core curriculum, individual planning, and responsive services), and to operate within a school culture in which every student receives benefits of the program. As student advocates and as members of the educational team, school counselors are essential to the school effort to teach students in a school environment that is safe and respects the rights of every member of the school community.

### Middle School Counseling Program
