

# Adding Chrome to Your Home Screen for Y5 Android Devices

## Adding the App to Your Home Screen

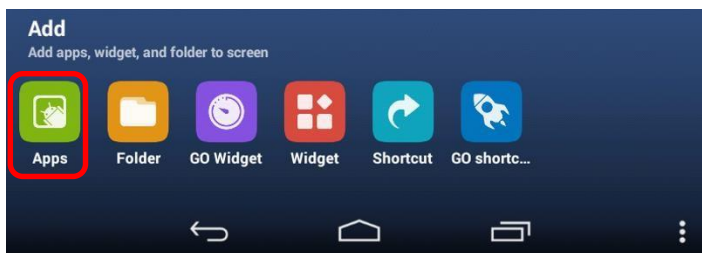

1. From the home screen, tap the additional options icon  in the lower right corner.
2. Scroll right to find and select the “**Unlock Edit**” icon.

3. Tap the additional options menu again  in the lower right corner of the home screen.
4. Find and tap the “**Add**” icon.

5. Find and tap the “**Apps**” icon.

6. Scroll through the apps to find the app you want (Chrome). (Be aware some apps you see here will be “locked down” and you won’t be able to use them.) Tap on the Chrome app. This will send the icon to your home

screen.

## Adding Chrome to Your Home Screen for Y5 Android Devices

7. Tap the home button.
8. You can leave the app icon where it is, or you can tap and drag it to a new location or into the app folder.
9. Tap the additional icons menu. Scroll right to find and select the “**Lock Edit**” icon. (see image below)
