

## OSHA 10 Certification

OSHA **Construction** Outreach Training is an orientation and safety program for anyone involved in the construction industry.

OSHA training is becoming mandatory in more states and industries every day.

The OSHA Outreach Training Program is OSHA's primary way to train workers in the basics of occupational safety and health. The OSHA Construction Outreach Training Programs were developed by the OSHA Training Institute with the intent to assist employers in training and introducing employees to the basic practices of identifying, reducing, eliminating and reporting hazards associated with their work.

Over the past three years, over 1.3 million students have received training through this program.

This course is designed for construction workers as an ideal orientation to those who are new to the industry and as a reminder those who have been working in the industry to the hazards associated with their work.
