Purpose: The purpose of the screening is to identify any developmental delays that may interfere with your child’s learning and growth. The screening is also provided to help parents identify their child’s strengths and weaknesses, and to determine if a child needs further evaluation for special education eligibility.

Who is Eligible for screening? Preschool screenings are offered to all children 3 to 5 years of age, who live in the University Place School District. All school districts within Washington State have Child Find screenings available. If your family is living in a temporary situation, you may contact the district where you are currently living to schedule a screening.

What is Childfind Screening? It is a free screening of your child’s development and skill level. Including:

- Large muscle development
- Eye-hand coordination (fine motor skills) and vision
- Communication and hearing
- Concepts
- Personal-social skills
- Self-help skills
