for more detailed dates and the most up to date information and schedule changes.

THANK YOU for your generous donations!

Ms. Ray, Mrs. Kuehl and the staff at Big Bay de Noc would like to extend our greatest thanks to all of the wonderful donors to this year's Giving Tree. We may not have had a traditional Giving Tree, but thanks to all of your generous donations, we were able to brighten the holidays for many families during these difficult times. In a time where so many families are uncertain of what is to come next, we stepped up as a community to spread Christmas cheer. Thank you once again. We wish you all a very safe and happy new year!

Thank you! From the Big Bay de Noc Athletic Booster Club!

The BBdN Booster Club would like to extend their sincerest thanks to all of our wonderful community members for your generous support! Whether it be supporting our athletes at sporting events, purchasing pasties or raffle tickets, or participating in our summer fundraisers, we thank you! We could not support our athletes without you!

If you are interested in becoming a member of the Booster Club, please email bigbayboosterclub@gmail.com for meeting information.

Spreading Christmas Spirit

The week before Christmas Break, students in grades Pre-K through 8th, and our virtual students in 9th through 12th were encouraged to spread Christmas Spirit with various dress up days! These days ranged from sporting Christmas headgear to wearing Christmas sweaters and ended the week with pajama day!

We hope your Christmas Break is filled with Christmas spirit and we wish you well!

BIG BAY DE NOC SCHOOL

January 2021

"Our Future Begins Now!"

Mr. Gierke's Coding Class

The 6th/7th Grade Coding Class has been working hard on their own personal website project. This project involves the use of the coding website Code.org, which is a mainstay for learning various types of coding languages. Students were encouraged to be as creative as they could be when creating their website while also making it both fun and informative. Their websites were coded using HTML and CSS languages which are both in-demand coding languages for many future career choices. So, this project was not only fun, but also very practical. Upon completion, they were able to share their websites, so be sure to ask your favorite Coding Student to show you their personal website today!

How the Grinch DIDN'T Steal Christmas!!

Mrs. Kuehl worked with the 2nd graders on a Google Slide project titled, "How to Stop the Grinch from Stealing Christmas!" If you haven't had the chance, please pop on the school Facebook page to check out their hard work!

Political Parties in Civics

Mr. Faust's Civics class has been busy learning about political parties and the history of political parties in the United States. For a final project, students were able to create their own political parties. Students were able to use the content that they learned in class and apply it to their own beliefs and ideas about government. Students spoke about issues facing our country from the environment to education to taxation. Students presented their final project to the class and tried to recruit others to their political party. Check out the pictures below for some of the examples of the political parties that the students created.

Abbey Matheny

Brendon Johnson

Purple Party

Angus McPhee

Eco-Liberty Party

"A healthier nation is a better one, for everyone"
